C.I.I. Virginia Ed Tech Grant (NCLB Ed Tech) Research Required By The Federal Government

The Enhancing Education Through Technology Ed Tech Program grant awarded to the Consortium for Interactive Instruction is federally funded through the No Child Left Behind initiative of President George W. Bush. A requirement of the grant is to evaluate the effectiveness of the workshops to show accountability for the use of the funding. The following briefly describes the research efforts and what is expected of teachers who elect to take advantage of the many excellent professional development opportunities offered.

In General

The evaluation was developed to address a number of domains to ensure all aspects of the activities are covered, as well as to provide checks and balances over the various phases of technology infusion, from the training opportunities themselves to the ultimate goal—classroom implementation. The evaluation involves faculty and staff who attend the training opportunities, the training opportunities themselves, and the resultant effect of the workshops on student learning. Recipients of the professional development provided by the grant will be asked to provide various evaluation data at three different times

What is expected of the participants? Prior to starting the professional development courses, participants will (typically) complete three (pre-course) surveys including basic demographics, an attitude survey, and a self-efficacy instrument. All three should take a total of about 25 minutes. Immediately following the course, participants will again complete the attitude and self-efficacy instrument (post-course). Lastly, and perhaps most importantly, after some time has passed, all participants will once again complete the two surveys (follow-up), plus an implementation survey to report on how well the course content is able to be used with students. At that point, some participants will be selected for a personal interview and perhaps even a classroom observation and videotaping.

Product evaluation. The lesson plans/final projects created by workshop participants will be reviewed by the course instructors and by the outside evaluation agency (ODU). Outstanding examples will be submitted for addition to the lesson plan database hosted by WHRO. Selected examples of classroom videotaping will be included with the lesson plans on the site. www.whro.org/nclb

Course evaluation. In addition to the evaluations done by the participants, the professional development

courses will also be evaluated by the outside evaluation agency (ODU). Results will help determine future offerings.

The evaluation is very important to the continued success of the grant. Each year, the effectiveness of the grant activities must be proven in order to receive funding for the subsequent year, which means that data input from everyone who takes advantage of these grant funded professional development opportunities is required. It's a small price to pay to receive such high-quality, sustained training for free!
